JOHN ADRIAN TICATIC

Full-Stack Developer

Batangas, Philippines • +63 955 822 5148 / +63 961 937 4348 • john.ticatic@gmail.com
linkedin.com/in/johnadrianticatic | github.com/aiannyyyy | johnadrian.dev

SKILLS

Languages
TypeScript, JavaScript, SQL, Python, C# / VB.NET

Frontend
React, Next.js, Tailwind CSS, Recharts

Backend
Node.js, Express, REST APIs, WebSockets

Databases
Oracle, PostgreSQL, MySQL, MongoDB, Supabase, Drizzle ORM

Cloud & DevOps
Docker, GitHub Actions, Vercel, Render, Railway

Testing
Vitest, Playwright

Desktop
VB.NET, WinForms, .NET Framework, Entity Framework, Crystal Reports, Electron.js

AI Tools
Claude Code, Codex, GitHub Copilot, Cursor

Automation
Power Automate, n8n, Zapier, Make

EDUCATION

BS Computer Science
Batangas State University
Lipa Campus
Graduated August 2022

CERTIFICATIONS

Claude 101
Anthropic Academy • 2026

Claude Code 101
Anthropic Academy • 2026

Introduction to Claude Cowork
Anthropic Academy • 2026

PROFILE

Full-Stack Developer with 2+ years of experience building web applications, internal tools and desktop systems. I work mainly with React, Next.js, Node.js/Express and TypeScript, on Oracle, MySQL and PostgreSQL databases. At a newborn screening laboratory, I build systems that replace manual Excel reports and an unsupported legacy LIMS, and now also support IT operations as one of two IT Managers. I improved system performance by 40% through query and backend work. Four of my projects have live demos with sample data at johnadrian.dev.

EXPERIENCE

IT Manager Nov 2026 - Present
Newborn Screening Center - Southern Luzon

- Continue to build and maintain the Corporate Dashboard, File Management System and desktop tools.
- Support IT operations together with the company's other IT Manager.
- Help plan IT projects, priorities and budget, and maintain system and IT documentation.

Computer Programmer I Jan 2024 - Nov 2026

- Built a Corporate Dashboard (React, TypeScript, Node.js/Express) that reads Oracle and MySQL data and shows KPIs, replacing manual Excel reports and an unsupported legacy LIMS.
- Improved system performance by 40% with indexes, rewritten queries, fewer database calls per page, and summary tables and views.
- Built a File Management System with department-based access, activity history, file previews and built-in team chat (WebSockets) in response to an ISO accreditation finding.
- Developed VB.NET desktop tools for filter card replacement tracking, image verification with local network notifications, and accounting, with Crystal Reports.

IT Support / Operator Feb 2023 - Jul 2023
Star Tollway Corporation

- Provided data entry and hardware/software support across company operations.

PROJECTS

Job Application Assistant *Next.js, TypeScript, PostgreSQL, Vercel*
Phone-first app that fetches jobs daily from 8 official job APIs, ranks them, and flags scam posts, with AES-256-GCM encrypted data, GitHub OAuth + argon2id login, and 800+ automated tests. Demo: job-assistant-demo.vercel.app

Task Management App *React, TypeScript, Node.js, MongoDB*
Full-stack MERN app with drag-and-drop task organization, workspace collaboration, and dark mode; deployed across Vercel, Railway, and MongoDB Atlas. Demo: task-management-app-rust-two.vercel.app

Corporate Dashboard *React, TypeScript, Oracle DB, MySQL*
Public version of my work dashboard with sample data: charts, KPI cards, and modules for laboratory, follow-up and IT job orders. Demo: nscsl-dashboard.vercel.app

File Management System *React, TypeScript, Node.js, PostgreSQL*
Public version with sample data: department-based access, file previews, activity history and real-time team chat. Demo: file-management-system-avhs.vercel.app
