Dear Hiring Manager,

I am writing to express my interest in a Software Engineer or Software Developer position at your organization. I am a developer with over two years of professional experience building web applications, desktop applications, and backend systems, as well as providing technical support in a corporate environment. My background has equipped me with strong problem-solving skills, a solid foundation in software development, and the ability to deliver reliable solutions that help teams work more efficiently.

Throughout my experience, I have designed and developed internal tools, RESTful APIs, data visualization dashboards, and file management systems. I work primarily with JavaScript, TypeScript, React, Node.js, Express.js, and databases such as MySQL, PostgreSQL, MongoDB, and Oracle. I am also experienced with version control using Git, deploying applications on Vercel and Render, and integrating real-time features using WebSockets. I am committed to writing clean, maintainable, and well-documented code.

You can see my work at johnadrian.dev, including four live demos that run on sample data and short case studies explaining how each one was built.

I am eager to bring my experience, work ethic, and enthusiasm for continuous learning to a team where I can make meaningful contributions. I value collaboration, attention to detail, and delivering practical solutions that address real business needs.

Thank you for considering my application. I would welcome the opportunity to discuss how my skills and experience align with your needs and am available for an interview at your convenience.

Sincerely,

John Adrian Ticatic
